

Appendix U

Process to Assess the Water Quality Impacts in the Design of All New Flood Management Structural Controls That are Associated With the City or Discharge to the MS4

4.2.6.8 Process to assess the water quality impacts on the design of new flood management structural controls.

1. Plans for new flood management structural controls will be submitted to the City for review.
2. The plans will be required to include impacts to water quality that will be created by the structural control.
3. Any negative impact, the design will be required to provide BMPs to mitigate the negative impact.
